PROFESSIONAL SUMMARY

Full Stack Developer with 5 years of experience in building scalable web applications and cloud-native platforms using React, Node.js, Python, and AWS. Experienced in designing microservices, managing cloud infrastructure, and leading end-to-end development lifecycles. Passionate about clean code, DevOps practices, and delivering impact-driven solutions.

TECHNICAL SKILLS

- **Languages**: JavaScript, Python, SQL, NoSQL, TypeScript
- **Frameworks**: ReactJs, NextJs, NodeJs, Django, NestJS
- **Frontend**: Redux, Tailwind CSS, Bootstrap, Material UI
- **Backend**: REST APIs, Sequelize, PassportJs
- **Databases**: MongoDB, PostgreSQL, DynamoDB
- **Cloud**: AWS (EC2, S3, Lambda, SAM, CloudWatch)
- **Tools**: GitHub, GitLab, Jira, Trello, Docker
- **DevOps**: AWS CLI, CI/CD (basic), Docker (intro-level)
- **Others**: MVC Architecture, Agile Methodology

CERTIFICATIONS

- **AWS Cloud Practitioner Certification**: Amazon Web Services, 2024

PROFESSIONAL EXPERIENCE

Excelra   **Feb 2023 - Present**
Software Specialist   *Hyderabad (Remote)*
Tech Stack: ReactJs, Django, AWS, NodeJs
- Built cloud-based microservices using Django and AWS (Lambda, S3, EC2), and developed responsive Uls with React and Tailwind CSS for a scalable product platform.
- Developed bioinformatics workflow Ul using React and integrated Python-based backend services to handle terabytes of sequencing data. Focused on improving data visualization and user authentication.
- Built reusable frontend components in React and integrated user-specific API authentication.
- Designed and consumed REST APIs in Node.js for dynamic data flow and enhanced plan tracking features.

Bacancy Technology   **Jan 2020 - Feb 2023**
Software Engineer   *Ahmedabad*
Tech Stack: ReactJs, NodeJs, NextJs, NestJs, MongoDB, PostgreSQL, AWS
- Developed modular frontend using React and Redux. Integrated secure user-level API authentication and reusable UI modules.
- Engineered backend using Node.js and managed AWS stack via SAM templates. Wrote unit/integration tests using Jest and enhanced monitoring via AWS CloudWatch.
- Created puppeteer scripts to scrape market data into MongoDB. Implemented Passport.js authentication and designed scalable APIs with Express and Sequelize.
- Built image upload features with AWS S3 and developed RESTful APIs integrating third-party sports-engine API for dynamic content rendering.
- Managed backend data models with Sequelize, built UI in React, and deployed modules for medical records, appointment scheduling, and cost estimation.

EDUCATION

KS School of Business Management, Gujarat University   **2020**
MSc, IT
- **GPA:** 3.78 / 5

KS School of Business Management, Gujarat University   **2018**
BSc, IT
- **GPA:** 3.54 / 5

HBK New High School   **2015**
Class XII
